

Wide range of waterproof quality products

## More than 105 years of experience

Started in 1919 as a tailor, later specialized in waterproof (work) clothing. Pioneer in high-frequency welding since 1958, a technique that ensures waterproof connections.

## Classifications

How much protection would you like to offer?

**classic**  
Durable and reliable, designed for those who value the trusted quality they're accustomed to.

**medium duty**  
A lighter version of the Classic line, offering comfort yet still suitable for heavy-duty work.

**featherlight**  
Ultra-light, breathable, and waterproof rainwear made from polyurethane (PU).

**high Visibility**  
Stay visibly and safe while being protected from water, wind, and dirt - all in one.

QUALITY CUSTOM PROTECTIVE WEAR >  
collection 2026/2027

# BUILDING & INDUSTRY

In the construction and manufacturing industries, clothing standards are becoming increasingly stringent. By using certified resources from Western Europe, we ensure compliance with these high standards.

## Serious workwear

## Production & delivery with a small CO<sub>2</sub> footprint

## Protective wear

Dolfig clothing offers a responsible choice by prioritizing environmental sustainability in various ways:

### Eco-Friendly Materials:

Our clothing is made using recycled polyester and PVC, with up to 70% of our fabrics sourced from reused and recycled materials.

### Waste Reduction:

We recycle production waste into new raw materials.

### Energy-Neutral Production:

Our electricity comes from in-house solar panels, with additional savings achieved through LED lighting and insulation.

### Climate-Neutral Delivery:

Our logistics partner, is committed to reducing greenhouse gas emissions and continuously improving its carbon footprint.

# FOOD & CLEANING

When handling and processing food, work clothing must protect the wearer from juices and food residue naturally produced during these tasks. In the cleaning industry, workwear must also be resistant to exposure to mild chemical substances commonly used in cleaning processes.
